TOZ TOPLAMA SİSTEMLERİ

Industrial Dust Collectors

Daima En İyisi,
Daima En Kalitelisi

Always the Best,
Always the Finest Quality

Ünalsan Makine 1981 yılında üretim hayatına başlamıştır. Ünalsan 1994 yılında başladığı toz toplama sistemi imalatıyla kısa zamanda hizmet ettiği sektörün güvenini kazanmıştır. Kalite, güven ve hizmetin adresi. 36 yıllık tecrübemizle Mobilya sektörüne hizmet sunmaktan gurur duyuyoruz.

Ünalsan ilk olarak taş motoru imal etmiş, daha sonra profil kesme makinesi, mozaik silme makinesi, parke silme makinesi gibi ürünleri bünyesinde üreterek TÜRK sanayisine hizmet vermiştir. Ünalsan 1994 yılında başladığı toz toplama sistemi imalatıyla kısa zamanda hizmet ettiği sektörün güvenini kazanmıştır.

Mobilya sektörünün toz emme ihtiyacını dikkate alan firmamız, gerekli fizibilite çalışmalarının ardından toz emme imalatına başlamıştır. O günden bu güne sadece toz emme ve filtreleme sistemleriyle meşgul olmuş, bu alanda kendini geliştirmiş ve yenilemiştir. Ünalsan, Metal Toz ve Talaş Emme Sistemlerinin imalatına seygar tip 1600m³/h normal ve zemin temizlemeli, 5000m³/h ve 7500m³/h yanları açık ürünlerle başlamıştır. Kısa zaman sonra ihtiyaca göre istenilen kapasitede toz emme sistemleri üretmiştir. Diğer ürünlerinin dışında toz toplama siloları ve hava tahliye siklonları gelmektedir. Ünalsan, mobilya ve ahşap sektörünün yanında metal ve plastik sektörünün de toz toplama ihtiyacını karşılamaktadır.

Ünalsan, kaliteyi ucuza sunma ilkesini kendine ilke edinmiştir. Bu ilke doğrultusunda sürekli makine parkurunu geliştirmiş ve üretimini hızlandırmıştır.

We feel proud for offering our experience to you as a service.

Ünalsan was founded in 1981 in Bursa by Osman Fahri Ünal as a small lathe workshop. Ünalsan has manufactured products such as grinder, profile cutter, mosaic polisher and parquet cleaning machine until 1994. Halit Sezgin joined to Ünalsan in 1994 and took over the leadership of Ünalsan. The company has started search new business opportunities and started to manufacture industrial dust collectors. Ünalsan has been producing only dust collectors since 1994. The company has grown to become one of the largest dust collector manufacturer in

Turkey. Ünalsan constantly strengthened its machine department to provide the quality cheaply. Our company established its vehicle fleet of technical service to give the best and fastest service of the sector. It succeeded to slam with its experienced technical service staff. Our goal is to supply the quality to wood industry by blending it with experience.

Always the best, always the finest quality.

- Toz toplama siloları; toz toplama ve filtrelemenin yanı sıra depolama yapabilen toz toplama sistemleridir.
- Depolanan talaş ister kamyonu boşaltılır, istenirse de katı yakıt kazanlarında yakıt olarak kullanılabilir.
- Depolanan talaşın sıkışmaması ve köprü oluşturmaması için karıştırıcı kullanılır.
- Depolanan talaş boşaltma ağızına helikon konveyör ile taşınır.
- Boşaltma ağızında hava kilidi bulunmaktadır.
- Hava kilidi boşaltma esnasında tozun çevreye yayılmasını önler.
- Torex ile talaş doluluk seviyesi otomatik kontrol altında tutulmaktadır.
- Modüler olarak imal edilmektedir.
- Elektrostatik toz boya ile boyanmaktadır.

- Dust silos; are the dust collection systems which can store the dust besides dust collection and filtration.
- The dust and chips stored either can be emptied in a truck or solid fuel boiler.
- A mixer is used for the stored dust and chips not to be pressed and not to create a layer
- The dust and chips stored is transferred to discharge outlet with worm screw conveyor .
- There is a rotary valve in discharge outlet.
- Rotary valve prevents the dust and chips to scatter out during discharge
- Dust storage level is kept under control automatically with torex
- The silos are manufactured modular.
- The silos are painted with electrostatic powder dye.

- Prizmatik Toz Toplama Siloları otomatik boşaltmalı sistemlerdir.
- Yatırım maliyeti açısından yuvarlak silolara göre daha ekonomiktir.
- Emiş fanları çalışmaya devam ederken silo boşaltma yapılabilir.
- Talaş dolum miktarını sesli olarak uyarın seviye sensörleri bulunmaktadır.

- Prismatic Dust Collection Silos are automatic discharge systems.
- It is more economical than round silos in terms of investment cost.
- While the suction fans continue to operate, the silo can be emptied.
- There are level sensors that warn the chip filling amount audibly.

- Ürün Big-Bag Çuvallı otomatik boşaltmalı toz emme sistemidir.
- Alt Boşaltma sistemi hava kilitlidir.
- İstenildiğinde Siloya aktarma yapılabilir.
- Big-Bag çuvalların değişimi ve kullanışlı olması avantaj sağlamaktadır.

- The product is a Big-Bag bag dust extraction system with automatic discharge.
- Bottom Discharge system is air locked.
- It can be transferred to the Silo when requested.
- Big-Bag sacks are advantageous to be changed and useful.

- Torbalı toz toplama sistemi olarak kullanılmaktadır.
- Ürün modüler olarak üretilmekte olup her modül 3000m³/h filtrasyon kapasitesine sahiptir.
- Torba değişimi kelepçeli yöntem ile basit bir şekilde yapılmaktadır.
- Hava tahliye bacalarından çıkan temiz hava soğuk hava koşullarında tekrar fabrika içerisine verilebilmektedir.
- Maksimum 4 ad. fan bağlanabilmektedir.

- It is used as a bagged dust collection system.
- The product is produced as modular and each module has a filtration capacity of 3000m³/h.
- Bag change is done simply with the clamp method.
- The clean air coming out of the air discharge chimneys can be given back into the factory in cold weather conditions.
- Maximum 4 pcs. fan can be connected.

Spiral Boru Ve Bağlantı Elemanları / Spiral Duct and Fittings

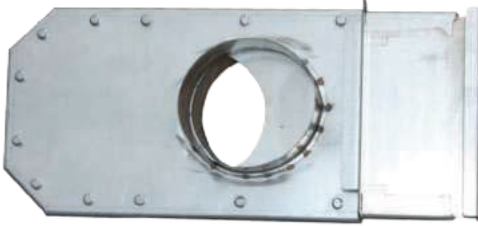

Ø80mm'den Ø600mm'ye kadar spiral boru imalatı yapılmaktadır. Ø125mm'den Ø600mm'ye kadar çatal, dirsek ve redüksiyon imalatı yapılmaktadır.

Uygulamalarımızda, spiral borular kullanılır ve birleştirmeleri flanşlar ile yapılır. Bu sayede borunun iç kısmında pürüzsüz yüzey elde edilir ve pvc gibi uzun lifli parçalarla tıkanmasının önüne geçilir.

Spiral duct is manufactured from Ø80mm to Ø600mm Elbows, laterals and reducers are manufactured from Ø125mm to Ø600mm.

Spiral ducts are used and ducts are connected via flanges in our applications. Thus smooth surface is provided inside the duct and the ducts are prevented by being blocked with long stringed chips such as pvc.

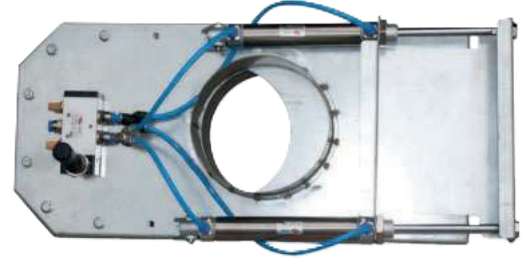

ELLE SÜRGÜLÜ KLAPE HAND SLIDING CLACK

Ø80mm'den Ø600mm'ye kadar sürgülü ve pnömatik klapeler imalatı yapılmaktadır.

Hand sliding and pneumatic sliding clacks are manufactured from Ø80mm to Ø600mm.

PNÖMATİK SÜRGÜLÜ KLAPE PNEUMATIC SLIDING CLACK

PARÇA TUTUCU PART SEPARATOR

Pvc ve tahta parçası vb. radyal fana gitmesi istenilmeyen taneleri ayıran parçadır. Farklı ölçülerde imalatı yapılmaktadır.

The part separates the pieces such as pvc and wooden parts which are undesired to pass towards the fan. Part separators are manufactured in different sizes.
